

1 Kite method

This reduces bulk between the legs and may be more comfortable for boys. Fold the nappy to form a kite shape. Bring the lower piece up between the legs. Bring the side pieces round to the front, and secure at each side with a nappy pin.

2 Triple fold

(1) Fold nappy in four with folded edges facing you and to left. (2) Pick up top layer by right-hand corner and pull out. (3) Make triangle with all edges meeting at top. (4) Turn nappy over and straighten edges again. (5) Pick up vertical edge and fold into centre by one-third. (6) Fold these layers over again to make thick central panel. (7) Add nappy liner.
